

LEARNING TREE PRESCHOOL MAY, 2022

WHAT WE ARE LEARNING

REPTILES/FROGS

The children will be exploring different types of reptiles, their habitats and their diet. We will learn the difference between a reptile and amphibian and the life cycle of a frog.

OCEAN ANIMALS

We will be exploring the ocean and many of the marine animals that call it home. We will learn what animals are mammals and why? Plus tons of fun arts and crafts, stories and songs.

ZOO ANIMALS

We will be finishing the month discovering the types of animals that you find in the zoo. The children will discover what a zoo keeper does, what the animals eat, and where in the wild you would find these animals.

A NOTE TO PARENTS

Friday May 27th will be the last day of preschool until August 22nd. We will be having a special goodbye party that day for our preschool friends, as well as recognizing our friends who will be leaving us for Kindergarten in the Fall. More details to come!
